Trina Solar’s Vertex Backsheet Performance Warranty

The unique design provides optimized energy production under inter-row shading conditions.

- Lower temperature coefficient (-0.36%) and operating temperature

- Excellent IAM (Incident Angle Modifier) and low irradiation performance, validated by 3rd party certifications

- Lower LCOE (Levelized Cost Of Energy), reduced BOS (Balance Of System) cost, shorter payback time

- Lower guaranteed first year and annual degradation

- Designed for compatibility with existing mainstream system components

- Higher return on Investment

- Minimized micro-cracks with innovative non-destructive cutting technology

- Ensured PID resistance through cell process and module material control

- Resistant to harsh environments such as salt, ammonia, sand, high temperature and high humidity areas

- Mechanical performance up to 5400 Pa positive load and 2400 Pa negative load

- High power Mono Perc up to 505W
  - Large area cells based on 210mm silicon wafers and 1/3-cut cell technology
  - Up to 21.1% module efficiency with high density interconnect technology
  - Multi-busbar technology for better light trapping effect, lower series resistance and improved current collection
